Kyriakos Koutsourelis

IT & Cloud Operations Engineer | Co-Founder @ Gain.gr | AI Enthusiast | Web & IT Background
Ioannina, Epirus, Greece

Summary

Innovative and diligent professional with a strong foundation in AI, web design, IT support, and programming. Demonstrated expertise in both team environments and independent projects, including co-founding Gain.gr, a non-commercial platform that brings accessible AI news and education to Greek-speaking audiences, especially those without a technical background.

Passionate about programming and artificial intelligence especially its ethical use, social impact, and ability to support critical thinking.

Committed to lifelong learning and growth in the fast-evolving tech world. I stay current through focused side projects and targeted certifications, continually sharpening both technical and communication skills.

Experience

Terracom S.A.
IT & Cloud Operations Engineer
December 2025 - Present (7 months)
Ioannina, Epirus, Greece

Supporting and maintaining corporate IT infrastructure, including laptops, servers, network equipment, and peripherals.

Assisting in the operation and supervision of cloud infrastructure (AWS, Azure, or equivalent) used for SaaS platforms.

Contributing to DevOps practices such as CI/CD pipelines, monitoring, backups, and scaling.

Helping ensure the security, availability, and reliability of IT and cloud systems.

Working closely with the CTO and development teams on technical improvements, processes, and new initiatives.

Gain - Greek AI Network
Co-Founder

April 2024 - Present (2 years 3 months)

I co-founded Gain.gr, an independent digital platform dedicated to making artificial intelligence understandable, accessible, and relevant to Greek-speaking audiences — especially non-technical professionals, students, and curious individuals.

Our mission is to bridge the gap between advanced AI developments and everyday users by publishing clear, practical content in Greek. All of our articles are freely available — no subscriptions, no paywalls, and no ads — to ensure that everyone can learn about AI without barriers.

Key responsibilities and contributions:

1. Designed and co-developed the Gain.gr website.
2. Publish regular news, explainers, and opinion pieces tailored to non-expert readers.
3. Emphasize ethical use of AI and promote awareness of its social and practical impact across industries.
4. Advocate for the responsible adoption of AI — not as a replacement for human thinking, but as a tool to enhance it.
5. Foster public understanding of AI with content that encourages informed, critical engagement.

Gain.gr is a non-commercial initiative aimed at empowering Greek readers to explore the world of AI — freely, ethically, and with clarity.
